

**Alabama Board of Nursing and Alabama Board of Medical Examiners**

**PSYCHIATRIC AND MENTAL HEALTH  
CERTIFIED REGISTERED NURSE PRACTITIONER**

**Standard Protocol in Collaborative Practice  
Core Duties and Scope of Practice**

1. The certified registered nurse practitioner (CRNP) may work in any setting consistent with the collaborating physician's areas of practice and function within the CRNPs specialty scope of practice. The CRNPs scope of practice shall be defined as those functions and procedures for which the CRNP is qualified by formal education, clinical training, area of certification and experience to perform.
2. The following core duties/functions are part of the standard protocol which may be performed by the CRNP:
  - A. Arrange inpatient admissions, transfers and discharges in accordance with established guidelines/standards developed within the collaborative practice; perform rounds and record appropriate patient progress notes; compile detailed narrative and case summaries; complete forms pertinent to patients' medical records.
  - B. Perform complete, detailed and accurate health histories, review patient records, develop comprehensive medical and nursing status reports, and order laboratory, radiological and diagnostic studies appropriate for complaint, age, race, sex and physical condition of the patient.
  - C. Perform comprehensive physical examinations and assessments.
  - D. Formulate medical and nursing diagnoses and institute therapy or referrals of patients to the appropriate health care facilities, agencies; and other resources of the community or physician.
  - E. Plan and initiate a therapeutic regimen which includes ordering legend drugs, medical devices, nutrition and supportive services in accordance with established protocols and institutional policies.
  - F. Institute emergency measures and emergency treatment or appropriate stabilization measures in situations such as cardiac arrest, shock, hemorrhage, convulsions, poison and allergic reactions. In emergencies, initiate mechanical ventilatory support and breathing if indicated.
  - G. Interpret and analyze patient data, results of laboratory and diagnostic tests.
  - H. Provide instructions and guidance regarding health care and health care promotion to patients/family/significant others.
3. In addition to functions/procedures within the scope of an RN, the collaborating physician and CRNP determine if a procedure on the protocol is necessary to their collaborative practice site. The physician must be qualified to provide medical direction for the procedure; the CRNP who lacks current proficiency is responsible and accountable for obtaining sufficient guidance, education or supervision for safe practice prior to performing a procedure. The CRNP should have on file the documented training, education and competency validation for all of the skills/procedures listed below and agreed upon with the collaborating physician, which include but are not limited to the following Standard Skill/Procedure Protocol.

The skills/procedures taught in the Nurse Practitioner (NP) academic education do not require individual documentation.

The collaborating physician and CRNP may document and validate that the NP has received: the education, training, and competency to comply with the rules and regulations pertaining to CRNPs duties and physician's collaborative practice.

## ABN: Psychiatric and Mental Health CRNP

The collaborating physician and the CRNP may document the NPs current proficiency, also, identify skills allowed and acquired since joining the collaborative practice, plus plan for education and instruction for further skill development.

The signatures below indicate the skills/procedures previously acquired and proficiently performed in this collaborative practice.

Standard Skill/Procedures Protocol (* Indicates RN Practice)	Physician Initials indicate Procedure is Allowed at Practice Site  No = not allowed		Education and Competency Validation  ✓ or Date = Previous Validation N/A = Not Applicable		
	Permitted (Yes)	Not Allowed (NO)	Basic NP Education	Previous Validation	Instruction to be Scheduled
Performs a Comprehensive biopsychosocial assessment					
Performs biopsychosocial developmental screenings					
Performs risk assessments for suicidal, homicidal, substance abuse behaviors and life threatening physical conditions					
Performs cultural assessments including mind, body, spiritual, and genomics factors					
Conducts psychotherapy with individuals, families or groups					

- Additional specialty skills may be requested for the CRNP (i.e., diagnostic or therapeutic procedures requiring additional training, monitoring and/or onsite physician availability) as provided in ABN Administrative Code Chapter 610-X-5-.10 (3). The protocols are determined by the practice site and specialty certification. They are available under the Advanced Practice Tab on the ABN website.
- The signatures below indicate the Standard Protocol Agreement for this collaborative practice and define the skills the collaborative physician has approved for the collaboration with this CRNP.

We hereby certify under penalty of law of the State of Alabama that the foregoing information in this Standard Protocol is correct to the best of our knowledge and belief. We understand that we are jointly and individually responsible for complying with the rules and regulations pertaining to CRNP and the collaborative practice of CRNP with physicians.
